Spectacular entertainment experience powered by exceptional 10-bit TrueColor display and dual speakers

Carrying forward with Mi 11, Xiaomi Mi 11 Lite is packed with performance and built to entertain. Featuring 10-bit TrueColor, Mi 11 Lite offers a staggering 1.07 billion onscreen colors. This allows for smoother gradations and a more natural transition between hues, showcasing real-to-life images of sunsets, or portraits that convey the emotion of your subject. It also features DCI-P3 color gamut for vivid imagery, high color accuracy, and color retention. In addition, to create a complete immersive entertainment experience, Mi 11 Lite comes with dual speakers with Hi-Res Audio and Hi-Res Audio Wireless certification.

Continuing the heritage of delivering best-in-class camera performance

Mi 11 Lite continues Xiaomi's legacy of innovative camera technologies on the Mi line-up. Featuring a triple rear camera array of a 64MP main camera, an 8MP ultra-wide angle camera, and a 5MP telemacro camera, Mi 11 Lite takes detailed and colorful shots to record your favorite memories.

Both the wide-angle camera and the front cameras have been optimized for low-light conditions with Night Mode, enabling users to take stunning images of sunset landscapes, nighttime cityscapes or night-out selfies with higher brightness, sharper contrast and more details. The cameras are further boosted by a fun selection of new video modes and filters that allow anyone to easily capture pro-level, cinematic footage that would otherwise require a high level of expertise and expensive equipment to create.
